**GROw PRACTICE: SHOW IMPROVEMENT**

By choosing this door, you know that you have things to address, and you are wanting to use data to demonstrate ownership!

Individual observations are critical for finding patterns and increasing your own awareness. This helps you articulate better to groups. The power in change, however, is observing as a group, and now you have the opportunity to do that.

# Daily Stand-Up Questions

1. How can you show, with data, the impact of your current work?
2. Can you use that data to prioritise your work?

# Weekly Retrospective Questions

*These are intended to retrospect on a recent demo.*

1. Write a card for each piece of work that was done, whether it was included in the demo or not.
2. Categorize the cards across 1) didn't show it, 2) showed the work output, or 3) showed the impact of the work output.
3. Based on the first two categories, what would it have taken to show the impact? What data would you have needed?
